<u>Homeschool: Sustainability Challenge</u>   <u>Friday, February 21st, 2020</u>

Number: 16 students, ages 5-15 (37 students, 3 LDPs, 1 adult)

<u>Group Notes:</u>

Website Description: Learn a lesson from "The Lorax" then put it into action as you ad a group of students compete against other students to establish the most energy efficient village in our new game, "Energy choices." Put your engineering or physics mind to work through creative thinking or physical skill work alongside your teammates to win the sustainability challenge.

The Homeschool Leadership Program (LDP) allows students ages 12-16 to work with you side by side to prepare and execute the program in the afternoon. Designate a staff member to be the LDP leader for the morning. Spend time with the students researching and preparing the afternoon programming. Identify a few leadership responsibilities the student can have during the afternoon and help them understand what their role will be. Their day centers on leadership education and service learning.

Depending on total number of students, we will be dividing the students into 2 age groups 5-8 and 9-15. Programming will be tailored to help fit these age groups.

Some parents may attend with their kids and bring younger siblings (babies and 2-4 yr olds). Programming can include those kids, but should focus on the older age range. Most parents will drop their kids off- we'll have forms for them to fill out so we can use safe pickup procedures.

8:00   Camp staff arrive, program set up.

10:00   Arrival and drop off

              Programming: Get to know you and teambuilding
                        Intro to subject, setting up foundational knowledge
                        Intro experience/activity
                        LDPs help plan the afternoon experience for students

12:00   Lunch in the Dining Hall– Kitchen Patrol with LDPs (Service Learning)
